Age 24	Age 25	Age 26	Age 27	Age 28
NOW	11%	20%	17%	9%

Egbuka is a high-floor asset in Superflex due to his immediate target share and age-adjusted production. While he lacks the elite ceiling of the top-tier WRs, his role as a primary target for Baker Mayfield provides a stable WR2 floor for several seasons.

Outcome Range

Season Progression

Trajectory & momentum

Current Momentum

Earlier 3 **12.9** W10, W11, W12 → -43% → Previous 3 **7.4** W13, W14, W15 → -47% → Last 3 Games **3.9** W16, W17, W18

Season Trend

16.3 First 9 games → **6.1** Last 8 games

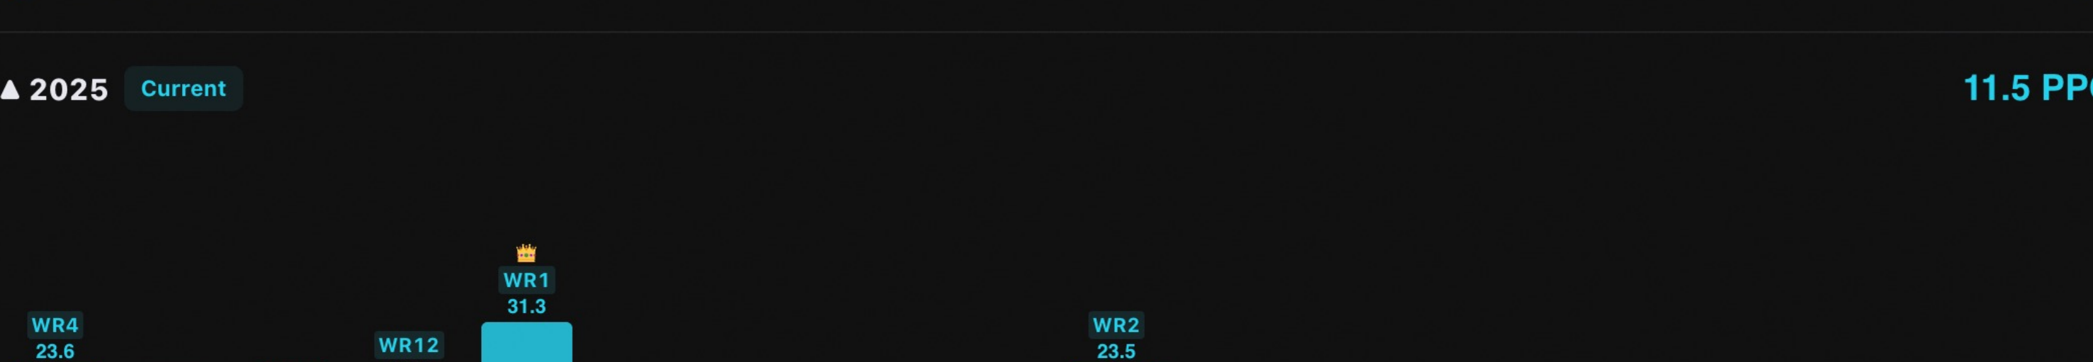
↓ 63% decline in the second half

Snap Trend Velocity

Snap share trajectory

↓ Falling -6.7 pts/wk

Snap % · Season



Early **79%** W13–W15 → Recent **57.3%** W16–W18

Emeka Egbuka's snap share has declined from 79% to 57.3% recently. This could reflect a scheme change, nagging injury, or increased competition. Dynasty owners should monitor closely — sustained snap loss erodes future upside.

Injury History

Grade: A+

A+

Clean bill of health

Currently out — Questionable, moderate. No prior games missed on record. Limited track record — only 2 NFL seasons of history, so treat this grade as provisional.

Hamstring (1x)

2026 · W0 **Questionable** **Moderate** — **Currently out**
Undisclosed

2025 · W6 **Hamstring** **Minor** — **Played through**
Suffered a hamstring injury in Week 6 against the 49ers and was ruled out for the remainder of the game, but did not miss the following week's game.
